The Three-Part Process

Discover your natural abilities, skills, and the results you get at work using strengths and personality assessments. You will build confidence through data-driven self-awareness and understand how your unique talents translate into marketable skills employers value.

Part 2: Messaging

Effectively communicate with others during the process by crafting a clear, memorable personal brand that showcases your unique value. You will develop customized messaging for your resume, LinkedIn, and value proposition.

Part 3: Job Search

Access practical tools to getting out there and finding what's next for you. You will learn to navigate informational interviews, job interviews, negotiations, and more. You will develop a targeted approach to identify and pursue the right opportunities.

The Cost of DIY

Can the Career Navigator *really* provide what you need to land a job? It's a valid question. Here are common hesitations we hear from other job seekers like you.

I have to be careful about what I'm spending. I don't want to lose my money.	I've tried other programs in the past and they didn't work.	I'm already overwhelmed. I don't want to waste my time and energy.	Why do I need anyone's help? I can do this on my own.
<p>We get it. You want to know your investment will offer a good return. Most clients get a pay raise after going through the Career Navigator. Of those who have completed the program, 97% have either landed their next job or know what they're looking for and how to find it. What you need to know about Career Navigator is that we rely on industry-leading assessments and data. We help you stand out in a competitive job market. The Career Navigator teaches you how to communicate your value, make a great first impression, and plan out the conversations you will need to stand out from the crowd.</p>	<p>Time is our most valued commodity. It walks you through a step-by-step process that has proven effective for 100's of job seekers, removing distractions, time wasters, and shallow advice that are robbing you of momentum and effectiveness in your quest for what's next.</p>	<p>Self-sufficiency is part of our culture, but going on your own can get pretty lonely and you might revert to the Solo-itis job search fail (learn all 12 job search fails here). We live best in community with others, and career planning isn't any different. VOCA's Career Navigator is the antidote to isolation, providing you with a trusted guide to walk with you through the journey.</p>
